Switch IN... to the future!

# EHTx

## Smart Operator

**15 to 420kV / 1200 to 6000A**

## TRULY RELIABLE

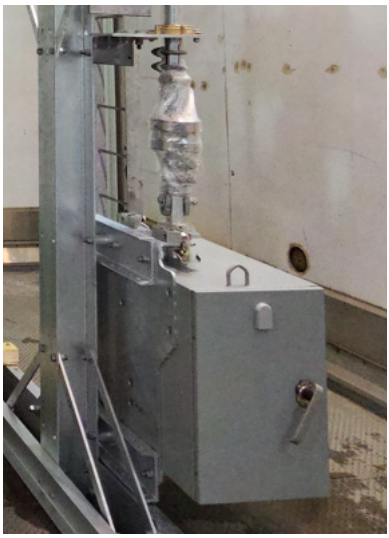

An intelligent and robust motor operator for controlling and monitoring disconnect switches. It offers variable speed control, monitoring, SCADA signaling, optional IEC 61850/ DNP 3.0 communication protocols, optical positioning and more.

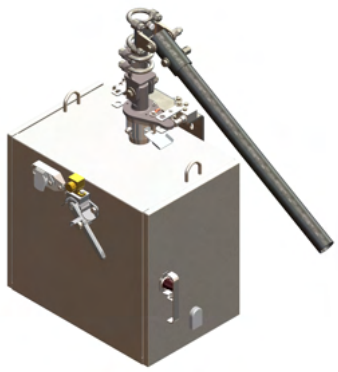

This smart operator is compatible with most disconnect switches manufactured requiring either a single-turn rotation of 45 to 220 degrees or multiple turns. Using high precision gears, a robust gearbox and an overdesigned motor, it is designed to operate for the life span of the disconnect switch.

The result of years of research and development. It is designed to provide utilities and heavy industrials a level of intelligence, security and efficiency not previously available. Furthermore, it is designed to be virtually maintenance free.

- → OPTICAL POSITIONING SYSTEM AND DYNAMIC BREAK
- → MONITORING AND REAL-TIME ANALYSIS
- → VARIABLE SPEED CONTROL REDUCED INRUSH CURRENT
- → OPTIONAL INTELLIGENT OPERATION SEQUENCE
- → NOTIFICATION/COMMUNICATION MECHANICALLY CONFORMS
